wialon

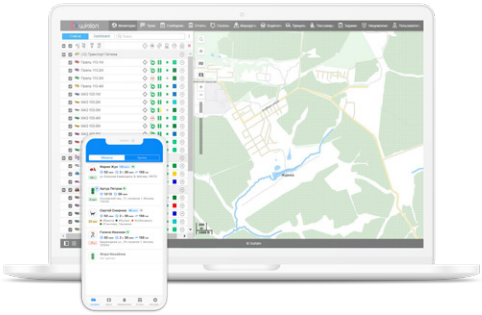

Take fuel consumption under control with the Wialon fuel module

What is Wialon?

It is a multifunctional GPS tracking platform with the advanced fuel tracking capability.

Wialon is a #1 fleet management system in the world in terms of the connected vehicles. It is a perfect solution for tracking almost any type of transport, from trucks and agricultural machines to boats and light airplanes.

With Wialon, you can:

- reduce fuel thefts by 90%
- optimize fleet efficiency by 30%
- decrease fuel costs by 15%

ADVANTAGES OF TRACKING FUEL WITH WIALON

- **Monitor fuel thefts** and fillings right on the map
- **Check out fuel level** inside the tanks in real-time
- **Use Dashboard** to track the key fuel-related KPIs in one place
- **Receive notifications** on fuel fillings and thefts via email, SMS, and push notifications on your smartphone
- **Equip your vehicles** with almost any type of fuel level sensors
- **Analyze fuel consumption** through flexible reports
- **Effortlessly integrate Wialon** with other systems already used by your company for effective fuel accounting
- **Reduce fuel consumption** through improving your drivers' professional skills via the Eco Driving features

FULL CONTROL OVER FUEL BUDGET

Use one way of tracking fuel suitable for your project or combine them for extra accuracy and business insights.

FLS data
Compare fuel level in the tank at different time points.

Math
Use engine operations and efficiency sensors' data as coefficients for fuel consumption rates.

CAN bus
Monitor fuel parameters eceived by the CAN bus of your vehicles.
